business...
fast wins.***

Helping your customers
“*speed through*” your
drive-thru!

SpeedThru® Drive-Thru Systems:

- Crystal clear two-way communications both at the order point as well as in the restaurant.
- Acoustic echo cancellation, noise reduction, and full-duplex technologies.
- Four key issues solved: background noise, echo, system noise, and artificial sounding voices.
- Withstand vigorous abuse and intense environments.
- Superior durability and reliability: most robust on the market today.
- Simplest system to run: Setting up and using is hassle free! So you can focus on what is important, running your business.
- Lowest total cost of ownership: Initial purchase, industry’s most comprehensive warranty including favorable headset replacement, and integrated durability and reliability features which reduce lifetime repair costs.

“We have found that the SpeedThru® drive-thru headset system provides us better sound quality both in and outside the restaurant than we were getting from our previous system. In the past, we had a lot of problems with noise coming from car engines in the drive-thru. The SpeedThru® system has eliminated these problems and has clarified the inbound and outbound sound. Additionally, we used to get a lot of annoying wind noise coming through the speaker post and SpeedThru® has taken care of that as well. We have found SpeedThru® to be trouble free!”

Jeff Hamm, Operations Manager
